

Project:

# REHABILITATION OF AKERSHUS QUAY

**LOCATION:**

Oslo

**YEAR:**

2016 - 2019

**CLIENT:**

Oslo Port Authority

**SCOPE/PHASE:**

Feasibility study/detail project/construction follow-up

**PROJECT RESPONSIBLE:**

Knut-Ola Lund (kol@olavolsen.no)

**PROJECT DESCRIPTION:**

Oslo Havn KF has commissioned a rehabilitation of the Akershus Utility Center below Akershus Fortress. The project includes pre-project, detailed project and follow-up during construction.

Dr.techn. Olav Olsen has mapped the existing structure and its condition. Thereafter, a number of different concepts were investigated to rehabilitate the dock's foundation with the condition that the warehouses on top should remain intact. When a decision was taken to move forward with a concept Olav Olsen prepared the concept and bid documents, helped with contract negotiations and technical follow-up during the construction phase.
