

Project:

# NORDEA HUSET

LOCATION:  
Oslo, Norway

YEAR:  
2012-2014

CLIENT:  
Nordea/Vedal Prosjekt

SCOPE/PHASE:  
Rehabilitation and reconstruction – feed to detailed engineering

PROJECT RESPONSIBLE:  
Anders Nybø (any@olavolsen.no)

## PROJECT DESCRIPTION:

Co-location redevelopment in new headquarters. The project entails, inter alia, the interconnection of Essendropsgates 7 and 9 for the establishment of "one house", miscellaneous rebuilding of the new structure of the entrance hall with significantly greater openness in the façade, opening of areas to the cellars, and the establishment of a new glass roof over the former backyard. In addition, a new megrler room, which is open over two floors, is built by the fact that existing roofs are demolished and established at a new height. The rebuilding has required extensive analysis of existing bearings, with resulting reinforcement measures. This is also initiated by new technical guides and installations, as well as special needs of the builder's organization.
