

Project:

BOTANICAL GARDEN GREENHOUSE

LOCATION:
Oslo, Norway

YEAR:
2009 - 2016

CLIENT:
Statsbygg

SCOPE/PHASE:
Feasibility study, and revised study

PROJECT RESPONSIBLE:
Anders Nybø (any@olavolsen.no)

PROJECT DESCRIPTION:

The structure's characteristic design makes the building a future landmark for Botanical Gardens outside Oslo City centre.

Dr. Techn. Olav Olsen has been responsible for the coordination of the technical advisory group put together by the builder, including architect.

As building engineering advisors, the company has contributed to a variety of assessments of concepts for carrying systems, including stability, constructionability and economics of the flexible and "organic" construction.

We have also conducted engineering geotechnics.
